

# Lab Technician Position at the Vienna BioCenter

universität  
wien

A full-time Lab Technician position is available at the Revilla-i-Domingo Lab, at the Department of Neuroscience and Developmental Biology of the University of Vienna (Campus Vienna BioCenter). The Vienna BioCenter provides an international and vibrant research environment near the center of Vienna. The Revilla-i-Domingo Lab is interested in unravelling and understanding the gene regulatory networks that control stem cell functions in sponges. Our work touches on questions of evolution, regeneration and deep-sea ecology, and it includes field trip expeditions to the Gulf of Trieste as well as to the Arctic Circle. Our tools include single cell technologies as well as bioinformatics. For more details, please see our lab website: <https://neurodevbio.univie.ac.at/revilla-i-domingo-research/>

As a lab technician, your tasks will be:

1. Drive research projects in the context of sponge stem cell gene regulatory networks as well as the adaptation of deep-sea sponges to the changing environment.
2. Participate in scientific expeditions.
3. Instruct and supervise students.
4. Help in organizing practical courses.

Requirements:

- Masters in life sciences or a related field.
- Experience in molecular biology techniques.
- Lots of enthusiasm for science!
- Proficiency in English (since the Revilla-i-Domingo Lab is a very international group, English is the primary language in the lab).

We offer a full-time position with a salary of 2460 € / month (brutto) at the Vienna Biology Building (UBB), at Djerassiplatz 1 (1030, Vienna).

If you would like to apply, please send your CV, a letter of motivation and the contact information of two referees to [roger.revilla-i-domingo@univie.ac.at](mailto:roger.revilla-i-domingo@univie.ac.at).

Dr. Roger Revilla-i-Domingo

**Department of Neuroscience and Developmental Biology**
