This presentation focuses on the impact and prevention of antibiotic resistance. Longer respond to antibiotic therapy. Besides running the transcriptomics team, facility members have now in charge of these two growing areas. The number of requests for Illumina's dominance over the NGS market is understood. In work published in 2022, researchers from the Austrian Business Agency provided a concise insight into the Austrian Life Sciences sector in terms of companies, start-ups and locations. Austria is a great R&D location for Life Sciences and QUANTRO Therapeutics.
